

# DERMEDICS™ COLLAGEN GEL

**Double power of rejuvenation!**

[collagen proteins + collagen extract]

**DERMEDICS™ COLLAGEN** is an innovative contact gel designed for aesthetic medicine purposes. It ensures the proper connection between electrodes, probes and the skin. Gel visibly rejuvenates the skin for a younger and healthier appearance.

Recommended for skin of all ages.

## Overview

- Contains unique formulation of collagen extract mixed with collagen proteins
- Improves skin elasticity
- Increases skin density and firmness
- Increases moisture retention
- Smooths the skin and plumps up lines
- Visibly rejuvenates the skin for a younger and healthier appearance
- Stimulates collagen synthesis
- Microbiologically pure
- With proper viscosity
- Transparent colour
- Hypoallergenic
- Water soluble
- Dermatologically tested

## Active Ingredients

Collagen proteins have increased ability to penetrate into the deeper layers of the skin. This unique formula of proteins mixed with collagen extract improves skin elasticity, increases moisture retention, smooths the skin and plumps up fine lines by increasing skin density and firmness.

## Directions for use

This product was developed mainly for procedures with needle-free mesotherapy:

- Ultrasounds (Sonophoresis)
- Electroporation (Electrophoresis)
- Iontophoresis

## This product can be used also with:

- Radio Frequency (RF)
- Cavitation (Ultrasonic Liposuction)
- Laser Lipolysis (optional just to provide extra anti-aging benefits for the skin)

## Packaging:

250ml 500ml 1000ml 5000ml
