

DERMEDICS™
SLIM GEL
Thermo effect + detox
[anti-cellulite booster]

DERMEDICS™ SLIM is an innovative contact gel designed for aesthetic treatments targeted on slimming and body shaping. It ensures the proper connection between electrodes, probes and the skin. Gel is recommended for slimming purposes to restore a healthier appearance of the body.

Recommended for skin of all ages.

Overview

- Boosts efficacy of slimming therapies
- Provides thermal effect to accelerate fat cell detox
- Supports anti-cellulite efficacy
- Accelerates lymphatic drainage
- Promotes anti-oxidant defence
- Microbiologically pure
- Transparent colour
- Water soluble
- Dermatologically tested

Active Ingredients

A perfect blend of extracts (**chestnut, ginkgo, arnica, green tea, ginger, cinnamon, paprika**) provides heating properties (thermo-active effect) to accelerate lymphatic drainage, skin detox as well as anti-oxidative efficacy.

Lymphatic drainage is provided by: chestnut, ginkgo, arnica.
These ingredients also strengthen blood vessels to prevent capillaries from breaking.

Thermo-active effect is provided by: ginger, cinnamon, paprika.

Anti-oxidant effect is provided by: green tea.

Anti-oxidant protection is very important in intelligent slimming therapies, because during intensive reduction of fat cells in the same time the level of free radicals increasing dramatically (this is a natural side effect of metabolic process of cells). That is why anti-oxidant efficacy is almost obliged to protect cells from overproduction and accumulation of lipofuscin associated with free radicals. Lipofuscin is a kind of cell-toxin that can lead to cell inflammation. Overproduction of lipofuscin in cells can be seen outside of skin on it's surface as brown spots - so called age-spots or liver spots. Usually they are located on face and hands where the skin is thinner. In hypodermis overproduction of lipofuscin promotes accumulation of fat cells - and that cause that slimming procedures are always less effective. That is the main reason why detox and anti-oxidant protection are so important in therapies targeted on effective slimming and cellulite reduction.

Directions for use

- This product was developed mainly for procedures with:
- Vacuum massages with Cellulogy™ and CelluDrain™
 - Slimming treatments with vacuum and RF in one (AdipoTherm™ RF)
 - Manual Lymphatic Drainage (MLD)

This product can be used also with:

- Cavitation (Ultrasonic Liposuction)
- Thermal blankets
- Body wrapping

Packaging:

Hypoallergenic | Paraben Free
Fragrance Free | Colourants Free
Allergen Free
